

Countermark  
H

```
graph TD; A((Countermark H)) --> B((Does the letter 'P' extend above the 'H'?)); B -- YES --> C((HP.a.)); B -- NO --> D((HW.a.a. or HW.a.));
```

This flowchart is used to classify a countermark 'H'. It starts with a black circle labeled 'Countermark H'. A thick orange line leads to a central orange circle asking 'Does the letter 'P' extend above the 'H'?'. From this central circle, two orange lines branch out: one labeled 'YES' leading to an orange circle labeled 'HP.a.', and another labeled 'NO' leading to an orange circle labeled 'HW.a.a. or HW.a.'.

Does the  
letter 'P'  
extend above  
the 'H'?

YES

NO

HP.a.

HW.a.a.  
or  
HW.a.
